Contour

Iso-lines of a landscape that does not exist. The field behind these is built so that it wraps exactly, which means the contours close around the tile rather than being cut at it — a line leaving one edge arrives at the other at the same height. Contour is survey weight, Band is the heavy sweep, Relief works two weights against each other. Large is where it belongs.

Scale and repeat

Every Contour design is a true seamless repeat. Each page shows the design at its large repeat, with small, standard and large scales below; any repeat from 2 to 52 in can be set. A repeat that divides the 52 in web (52, 26, 17.3, 13 in) matches drop to drop with no part repeat at the selvage.

Scale and colour

Every InkSonics® collection is scalable and colour-definable in the Ink-Tuitive® Studio at www.ink-tuitive.com. The six colourways on each page are starting points: set the repeat, and set ink, ground and accent to any colour or to a supplied chip.
