Woodgrains

Timber figure, drawn the way a millworker would name it. Cut is what the saw decides — plainsawn flame, quartersawn ray fleck, rift, burl, end grain. Character is what the tree decides — open pore, fine grain, ribbon stripe, knots, weathering. Layup is what you decide — plank, herringbone, chevron, parquet, shiplap. The grain runs on a continuous field rather than random lines, so it reads as one piece of timber rather than a drawing of one.

Scale and repeat

Every Woodgrains design is a true seamless repeat. Each page shows the design at its large repeat, with small, standard and large scales below; any repeat from 2 to 52 in can be set. A repeat that divides the 52 in web (52, 26, 17.3, 13 in) matches drop to drop with no part repeat at the selvage.

Scale and colour

Every InkSonics® collection is scalable and colour-definable in the Ink-Tuitive® Studio at www.ink-tuitive.com. The six colourways on each page are starting points: set the repeat, and set ink, ground and accent to any colour or to a supplied chip.

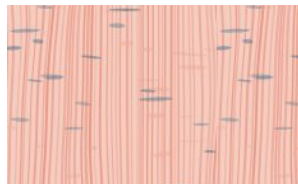

Specification

Codes read `PRODUCT-COLLECTION-PATTERN-REPEAT-WEIGHT-COLOURWAY` . Put the product code from the table above in front of the code on each page.
