Hide

Leather is read by its relief rather than its colour: a grain is a field of small domes, each lit on top and shadowed beneath, and what tells you which hide you are looking at is how those domes are sized and packed. Grain is the hide as it comes — pebble, full grain, nappa, buffalo. Exotic is the reptile and the bird, where the packing becomes a plate or a quill. Worked is what the tannery and the bench did to it afterwards: the pull of a saddle hide, a stitched seam, a punched brogue, a napped suede.

Scale and repeat

Every design is a true seamless repeat and can be specified at any width from 2 to 52 in. Pages show each design at its standard repeat, with small and large repeats shown for comparison.

Scale and colour

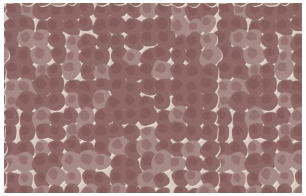

Every InkSonics® collection is scalable and colour-definable in the Ink-Tuitive® Studio at www.ink-tuitive.com. The six colourways on each page are starting points: set the repeat, and set ink, ground and accent to any colour or to a supplied chip.

Specification

Codes read `PRODUCT-COLLECTION-PATTERN-REPEAT-WEIGHT-COLOURWAY`. Put the product code from the table above in front of the code on each page.
